SAFETY INSTRUCTIONS

WARNING: If the information in this manual is not followed exactly, a fire or explosion may result causing property damage, personal injury or death.

- Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.

- WHAT TO DO IF YOU SMELL GAS
  • Do not try to light any appliance.
  • Do not touch any electrical switch; do not use any phone in your building.
  • Immediately call your gas supplier from a neighbor’s phone. Follow the gas supplier’s instructions.
  • If you cannot reach your gas supplier, call the fire department.

- Installation and service must be performed by a qualified installer, service agency or the gas supplier.

GENERAL

No cooking appliance should be used as a space heater. This instruction is based on safety considerations to prevent potential hazard to the consumer as well as damage to the appliance.

Your appliance is vented through the base of the backguard. Never block oven vent or air intakes. Do not obstruct the flow of combustion and ventilation air. Restriction of air flow to the burner prevents proper performance.

Avoid touching oven vent area while oven is on and for several minutes after oven is turned off. Some parts of the vent and surrounding area become hot enough to cause burns.

IN CASE OF FIRE:
1. Turn off range controls.
2. Smother fire or flame with baking soda, dry chemical, or a foam-type extinguisher. Do not use water on grease fires.
SAFETY INSTRUCTIONS

CHILD SAFETY
Do not leave children alone or unsupervised near the appliance when it is in use or is still hot. Children should never be allowed to sit or stand on any part of the appliance. Children must be taught that the appliance and utensils in it can be hot. Children should be taught that an appliance is not a toy. They should not be allowed to play with controls or other parts of the unit. Let hot utensils cool in a safe place, out of reach of small children.

CAUTION: Do not store items of interest to children in cabinets above an appliance or on the backguard of a range. Children climbing on the appliance to reach items could be seriously injured. Do not use an appliance as a step stool to cabinets above.

ANTI-TIP DEVICE
To reduce the risk of tipping of the appliance from unusual usage or by excessive loading of the oven door, the appliance must be secured by a properly installed anti-tip device. To check if device is installed properly: Use a flashlight and look underneath range to see that one of the rear leveling legs is engaged in the bracket slot. When removing appliance for cleaning, be sure anti-tip device is engaged when range is replaced. The anti-tip device secures the rear leveling leg to the floor, when properly engaged.

CLEANING
Turn off all controls and wait for range parts to cool before touching or cleaning them. Do not touch the burner grates or surrounding areas until they have had sufficient time to cool.

Touching a hot oven light bulb with a damp cloth could cause the bulb to break. Should the bulb break, disconnect power to the range before trying to remove the bulb to avoid electrical shock.

Clean range with caution. If a wet sponge or cloth is used to wipe spills on a hot cooking area, be careful to avoid steam burns. Some cleaners can produce noxious fumes if applied to a hot surface.

GREASE
Use extreme caution when moving the grease kettle or disposing of hot grease.

Hot grease is flammable. Avoid letting grease deposits collect around appliance, range hood, or vent fan. Do not leave container of grease around a cooking appliance. Always let quantities of hot fat used for deep fat frying cool before attempting to move or handle. In the event of a grease fire, DO NOT attempt to move pan. Cover pan with a lid to extinguish flame and turn surface burner off. Do not douse flame with water. Use a dry chemical or foam-type fire extinguisher, if available, or sprinkle heavily with baking soda.

Spills or boilovers which contain grease should be cleaned up as soon as possible. If they are allowed to accumulate, they could create a FIRE HAZARD.

COOKING SAFETY
Always adjust surface burners flame so that it does not extend beyond the bottom of utensil. This instruction is based on safety considerations.

Never leave a surface cooking operation unattended especially when using a high heat setting. Boilovers cause smoking and greasy spillovers may ignite.

Be sure you know which knob controls which surface burner. Always make sure the correct burner is turned on and that the burner has ignited. When cooking is completed, turn burner off.

Use caution when wearing garments made of flammable material to avoid clothing fires. Loose fitting or long hanging-sleeved apparel should not be worn while cooking. Clothing may ignite or catch utensil handles.

Never heat an unopened container on the surface burner or in the oven. Pressure build-up may cause container to burst resulting in serious personal injury or damage to the range.

Slide oven rack out to add or remove food, using dry, sturdy pot holders. Always avoid reaching into oven to place or remove food.

Use dry, sturdy pot holders. Damp pot holders may cause burns from steam. Dish towels or other substitutes should never be used as pot holders because they can trail across hot surface burners and ignite or get caught on range parts.

Use care when opening oven door. Let hot air or steam escape before removing or replacing food. Always place oven racks in the desired positions while oven is cool. If a rack must be moved while hot, be careful to avoid contact of pot holders with oven burner flame.
SAFETY INSTRUCTIONS

STORAGE ABOVE RANGE
To eliminate the hazard of reaching over hot surface burners, cabinet storage should not be provided directly above a unit. If such storage is provided, it should be limited to items which are used infrequently and which are safely stored in an area subjected to heat from an appliance. Temperatures in storage areas above the unit may be unsafe for some items, such as volatile liquids, cleaners or aerosol sprays.

UTENSIL SAFETY
Use only pans that have flat bottoms and handles that are easily grasped and stay cool. Avoid using unstable, warped, easily tipped or loose handled pans. Do not use pans if their handles twist and cannot be tightened. Pans that are heavy to move when filled with food may also be hazardous.

Always place a pan of food on a surface burner before turning it on, and turn it off before removing the pan.

Aluminum foil may cause damage to the oven, affect cooking results, and can also result in shock and/or fire hazards.

ALUMINUM FOIL
Use aluminum foil ONLY as instructed in this book. Improper use of aluminum foil may cause damage to the oven, affect cooking results, and can also result in shock and/or fire hazards.

PLASTICS
Many plastics are vulnerable to heat. Keep plastics away from parts of the appliance that may become warm or hot.

AEROSOL SPRAYS
Many aerosol–type spray cans are EXPLOSIVE when exposed to heat and may be highly flammable. Avoid their use or storage near an appliance.

SELF–CLEAN OVEN
Do not clean door gasket. The door gasket is essential for a good seal. Care should be taken not to rub, damage, or move the gasket. Do not use oven cleaners of any kind in or around any part of the self–clean oven. Clean only parts listed in this booklet. Before self–cleaning the oven, remove broiler pan, oven racks, and other utensils, and wipe off excessive spillovers.

It is normal for the cooktop of the range to become hot during a self–clean cycle. Therefore, touching or lifting the cooktop during a clean cycle should be avoided.

IMPORTANT SAFETY NOTICE AND WARNING
The California Safe Drinking Water and Toxic Enforcement Act of 1986 (Proposition 65) requires the Governor of California to publish a list of substances known to the State of California to cause cancer or reproductive harm, and requires businesses to warn customers of potential exposures to such substances.

Users of this appliance are hereby warned that the burning of gas can result in low–level exposure to some of the listed substances, including benzene, formaldehyde and soot, due primarily to the incomplete combustion of natural gas or liquid petroleum (LP) fuels. Properly adjusted burners will minimize incomplete combustion. Exposure to these substances can also be minimized by properly venting the burners to the outdoors.

VENTILATING HOOD
To reduce the hazard of storage above a range, install a ventilating hood that projects at least 5 inches beyond the bottom edge of the cabinets. A clean hood frequently to prevent grease from accumulating on hood or its filter. Should a boilover or spillover result in an open flame, immediately turn off the hood’s fan to avoid spreading the flame. After thoroughly extinguishing flame, the fan may be turned on to remove unpleasant odor or smoke.
ELECTRONIC CONTROLLER

CLOCK (time-of-day)
1. Press CLOCK pad.
2. Turn SET knob until display shows correct time-of-day.
3. Press STOP/CLEAR pad to lock in time.

When power is first supplied to oven or if there has been a power failure, the display will flash. Follow above instructions to set clock.

CLEAN
1. Close door.
2. Move door lock lever to locked position.
3. Press CLEAN pad. ("door" will flash in display and beeps will sound if door is not locked.)
4. Oven will automatically clean for 3 hours. Select 2 or 4 hours by turning the SET knob.

See page 5 for additional information.

BROIL
1. Press BROIL pad.
2. Turn SET knob clockwise to select HI broil or counter clockwise to select LO broil.
3. Press STOP/CLEAR pad to cancel broil operation.

See page 12 for additional information.

STOP/CLEAR
Press to cancel all operations except clock and timer.

(ACTE: All indicator words are displayed to show their location. When oven or timer is not in use, indicator words are not displayed. Indicators are only displayed when oven is set for a cook, delayed cook, clean or timer operation.)

TIMER (minute timer)
1. Press TIMER pad.
2. Turn SET knob to desired time.
3. TIMER starts automatically.
4. To cancel: Press TIMER pad and hold for 3 seconds or turn SET knob until :00 appears in the display. Time-of-day will reappear after a slight delay.

COOK TIME/STOP TIME
To begin cooking immediately:
1. Press BAKE TEMP pad and enter oven temperature with SET knob.
2. Press COOK TIME pad and enter desired cooking time by turning the SET knob.

To delay the start of cooking:
1. Press BAKE TEMP pad and enter oven temperature with SET knob.
2. Press COOK TIME pad and enter cooking time with SET knob.
3. Press STOP TIME pad and enter time you wish food to stop cooking with SET knob.

The oven will automatically turn on and off at the preset times.

Press STOP/CLEAR pad to cancel end-of-cooking beeps. See page 6 for additional information.

BAKE TEMP
1. Press BAKE TEMP pad.
2. Turn SET knob until desired oven temperature appears in the display.
3. Press STOP/CLEAR pad to cancel the baking operation.

See pages 10 to 11 for additional information on baking and roasting.

ADDITIONAL INFORMATION
A beep sounds each time a pad is pressed. Three beeps sound the end of an operation.
If a fault code (ex: F 2) is displayed and beeps sound, press STOP/CLEAR if fault code continues, see page 16.
Function pads on some models are round - they operate as described in this booklet.
FEATURES

SELF-CLEAN OVEN
The self-clean oven uses temperatures above normal cooking temperatures to automatically clean the entire oven.

TO OPERATE:
1. Close door and move door lock lever to the right (locked position).
2. Press CLEAN pad.

If door is not locked as described, "door" will flash in the display.

3. When the CLEAN pad is pressed, the oven will automatically clean for 3 hours.

TO CANCEL CLEAN CYCLE:
1. Push STOP/CLEAR pad.
2. If the LOCK indicator is not displayed, the oven door can be unlocked.
   - If the LOCK indicator is displayed, allow oven to cool (up to one hour). Once LOCK indicator turns off, the door can be unlocked.

DURING SELF-CLEANING
When the door is locked and the CLEAN pad is pressed, the oven automatically begins to heat to cleaning temperatures.

As the oven reaches cleaning temperatures, the LOCK indicator will turn on to show that an internal lock mechanism has engaged. At this point, the oven door can not be unlocked and opened.

To prevent damage to the door and lock lever, do not force the lock lever to the right when the LOCK indicator is displayed.

About one hour after the completion of the clean cycle, the internal lock will disengage and the LOCK indicator will turn off. At this point, the lock lever can be moved to the left (unlocked position) and the door opened.

The first few times the oven is cleaned, some smoke and odor may be detected. This is normal and will reduce or disappear with use. If the oven is heavily soiled, or if the broiler pan is left in the oven, smoke and odor may occur.

BEFORE SELF-CLEANING
Remove all pans from the oven. The racks may be left in, but will discolor and may not slide easily after cleaning.

Clean oven frame, door frame and around the oven vent with a non-abrasive cleaning agent such as Bon Ami. These areas are not exposed to cleaning temperatures and should be cleaned to prevent soil from baking on during the clean cycle.

Wipe up excess grease or spillovers from the oven bottom to prevent excessive smoking during the clean cycle.

DO NOT USE OVEN CLEANERS OR OVEN LINER PROTECTIVE COATINGS OF ANY KIND ON THE SELF-CLEAN OVEN FINISH OR AROUND ANY PART OF THE OVEN.

To prevent damage, do not clean or rub the gasket around the oven door. The gasket is designed to seal in heat during the clean cycle.

It is normal for the cooktop of the range to become hot during a clean cycle. Therefore touching the cooktop during a self-clean cycle should be avoided.

As the oven heats and cools, you may hear sounds of metal parts expanding and contracting. This is normal and will not damage your appliance.

AFTER SELF-CLEANING
Some soil may leave a light gray, powdery ash which can be removed with a damp cloth. If soil remains, it indicates that the clean cycle was not long enough. The soil will be removed during the next clean cycle.

If the oven racks do not slide smoothly after a clean cycle, wipe racks and embossed rack supports with a small amount of vegetable oil to restore ease of movement.

Fine, hair-like lines may appear in the oven interior or oven door. This is a normal condition resulting from heating and cooling of the porcelain finish. These lines do not affect the performance of the oven.
FEATURES

AUTOMATIC OVEN COOKING
Automatic cooking feature is used to turn the oven on and off at the preset time-of-day. This feature can be used to delay the start of a cooking operation.

The automatic cooking feature will not operate unless the clock is functioning and is set at the correct time-of-day.

TO BAKE BY TIME with immediate START:
1. Press BAKE TEMP pad. “BAKE” lights in the display.
2. Enter oven temperature with the SET knob.
4. Enter cooking time (how long you wish food to cook) with the SET knob.
   “TIMED BAKE ON” lights in the display. The oven automatically turns on and the display begins to count down.
5. At the end of the preset cooking time, the oven automatically turns off.
6. Press STOP/CLEAR pad to cancel end-of-cooking beeps.

TO BAKE BY TIME with delayed START:
1. Follow steps 1, 2, 3 and 4 above.
3. Enter the time you wish the oven to turn off by turning the SET knob. “DELAY TIMED BAKE” lights in the display. Time-of-day reappears in the display.
   The oven will automatically turn on in time to have the food cooked by the preselected STOP TIME. The oven will automatically turn off at the preset stop time.
4. Press STOP/CLEAR pad to cancel end-of-cooking beeps.

GENERAL INFORMATION

IMPORTANT: Highly perishable foods such as dairy products, pork, poultry, seafoods or stuffing are not recommended for delayed cooking. If cooking more than one food, select foods that cook for the same length of time and at the same oven temperature.

If you delay in entering a complete program, the oven may turn on. Just continue entering the program as described.

To reset or cancel the program: Press the STOP/CLEAR pad.

After setting the Automatic Cooking feature, press the CLOCK pad and the time-of-day will reappear in the display. “TIMED BAKE ON” or “DELAY BAKE” and the oven temperature will remain in the display as a reminder that the oven is set for a cooking operation.

At end of cooking, continuous beeps will sound. Press STOP/CLEAR pad to cancel beeps.

EXAMPLE
Food is to cook for 2 hours and 30 minutes at 350° F. You wish the food to be cooked by 6:00.
1. Press BAKE TEMP pad.
2. Turn SET knob until 350° appears in the display.
3. Press COOK TIME pad.
4. Turn SET knob until 2:30 (2 hours, 30 minutes) appears in the display.
5. Press STOP TIME pad.
6. Turn SET knob until 6:00 appears in the display.
   The oven will turn on at 3:30; cook the food for 2 1/2 hours, and will automatically turn off at 6:00.
USING YOUR COOKTOP

The cooktop and surface burners on this appliance are considerably different from a conventional gas appliance. To ensure proper and efficient use of all features, please take a few minutes to read these instructions and become familiar with the operation of this appliance.

COOKTOP

The cooktop is designed with two contoured wells which contain spills until they can be wiped up. Unlike the standard gas appliance, THIS COOKTOP DOES NOT LIFT-UP NOR IS IT REMOVABLE. To prevent damage to the gas tubing or top, do not attempt to lift cooktop.

GRATES

Burner grates must be properly positioned before cooking. Do not operate burners without a pan on the grate. The porcelain finish may chip without a pan to absorb the intense heat.

When reinstalling square grates, place indented sides together so straight sides are at front and rear.

CAUTION: Do not operate sealed burner without a pan on the grate. The porcelain finish of the grate may chip without a pan to absorb the intense heat from the burner flame.

DUAL PURPOSE SEALED BURNERS*

The four sealed burners are secured to the cooktop and are NOT designed to be removed by the consumer.

Since the four burners are sealed into the cooktop, boilovers won't seep underneath to the burner box area. Thus, there are no hidden spills in the burner box area to clean.

Some models feature two special HI SPEED sealed burners. Use the HI SPEED burners to quickly bring water to a boil and for large - pot cooking. See information on rating plate to determine if your appliance features the HIGH SPEED burner.

LOCATION OF BURNERS:

A properly adjusted burner with clean ports will light within a few seconds. On natural gas, the flame will be blue with a deeper blue inner core; there should be no trace of yellow in the flame, indicating an improper mixture of air/gas. This wastes fuel, so have a serviceman adjust the mixture if a yellow flame occurs.

Once burner lights, turn knob to the desired setting. The sparking will not stop until the knob is turned from the LITE position.

You may hear a "popping" sound on LP gas when the surface burner is turned off. This is a normal operating sound of the burner.

If flame should go out during a cooking operation, turn the burner off. IF GAS HAS ACCUMULATED AND A STRONG GAS ODOR IS DETECTED, WAIT 5 MINUTES FOR THE GAS ODOR TO DISAPPEAR BEFORE RELIGHTING BURNER.

IGNITORS

A sparking sound will be heard and the burner will light. (When one burner is turned on, all four igniters will spark.)

To light burner:

1. Place utensil on burner grate.
2. Push in and turn knob to the LITE position.
3. After the burner lights, turn knob to the desired flame size.

All four igniters will spark when any surface burner knob is turned to the LITE position.

Optional re-ignition system (if equipped) will automatically relight the burner if a draft should extinguish it when using a very low setting. When this occurs, you will hear a sparking or clicking sound.

*U.S. Patent Pending

—7—
USING YOUR COOKTOP

PILOTLESS IGNITION
Be sure all surface controls are set in the OFF position prior to supplying gas to the appliance.

TO OPERATE SURFACE BURNER DURING A POWER FAILURE.
1. When lighting surface burners, be sure all controls are in the OFF position. Hold a lighted match to the desired surface burner head.
2. Turn knob to LITE. The burner will then light.
3. Adjust the flame to the desired level.

SELECTING FLAME SIZE
If a knob is turned very quickly from HIGH to LOW setting, the flame may go out, particularly if burner is cold. If this occurs, turn the knob OFF. Wait several seconds, then light again.

Flame should be adjusted so it does not extend beyond the edge of cooking utensil. This is for personal safety and to prevent damage to cabinets above range.

If a LOW setting is to be used, preheat the burner on HIGH for a minute then reduce to the LOW setting and continue the cooking operation.

USE HIGH to quickly bring foods to a boil or to begin a cooking operation. Reduce to a lower setting to continue cooking. Never leave food unattended during a cooking operation.

Use LOW to simmer or keep foods at serving temperatures. Some cooking may take place if the utensil is covered.

If the ignitor is damaged or broken, the surface burner will not light.

CARE INFORMATION
When cleaning around the surface burner, use care to prevent damage to the spark ignitor which is located at the back-side of each burner. If a cleaning cloth should catch the ignitor, it could damage or break it. If the ignitor is damaged or broken, the surface burner will not light.
USING YOUR OVEN

PILOTLESS IGNITION
Glo bar-type ignition
With this type of ignition system, the oven will not operate during a power failure or if oven is disconnected from the wall outlet. No attempt should be made to operate oven during a power failure.

To replace door: Grasp door at each side, align slots in the door with the hinge arms and slide door down onto the hinge arms until completely seated on hinges.

To replace: Fit front edge of oven bottom into front frame. Lower rear of oven bottom and slide the catches back to lock oven bottom into place.

FAN
Slide in ranges are equipped with a fan which automatically turns on whenever the oven is set for cooking or cleaning. The fan will automatically turn off when the unit has cooled.

OVEN DOOR
When opening oven door, allow steam and hot air to escape before reaching in oven to check, add or remove food.

To remove door: Open door to the "stop" position (opened about 4 inches) and grasp door with both hands at each side. Do not use door handle to lift door. Lift up evenly until door clears the hinge arms.

To remove: When cool, remove the side. Do not use door handle to lift door. Remove oven racks. Slide the two catches, located at each rear corner of the oven arms.

To replace: Fit ends of drawer glides onto rails. Lift up drawer front and gently push in to first stop position. Lift up drawer again and continue to slide drawer to the closed position.

OVEN BOTTOM
Protect oven bottom against excessive splatter especially acid or sugary spills. Use the correct size cooking utensil to avoid boilovers.

To remove: When cool, remove the oven racks. Slide the two catches, located at each rear corner of the oven bottom, toward the front of the oven.

To replace: Lift the rear edge of the oven bottom slightly, then slide it back until the front edge of the oven bottom clears the oven front frame. Remove oven bottom from oven.

CAUTION:
Hinge arms are spring mounted and will slam shut against the range if accidently hit. Never place hand or fingers between the hinges and the front oven frame. You could be injured if hinge snaps back.

IMPORTANT:
DO NOT MOVE DOOR LOCK LEVER TO THE RIGHT DURING A COOKING OPERATION. If the door lock lever is moved to the lock position, the cooking operation will automatically be cancelled and "door" will appear in the display.
OVEN CHARACTERISTICS

Every oven has its own characteristics. You may find that the cooking times and temperatures you were accustomed to with your previous range may need to be altered slightly with your new range. Please expect some differences with this new range.

OVEN BURNER

The size and appearance of a properly adjusted oven burner flame should be as shown:

The oven temperature is maintained by cycling the burner on and off. After the oven temperature has been set, there will be about a 45 second delay before the burner ignites. This is normal, and no gas escapes during this delay.

During the clean cycle, and some extended oven cooking operations, you may hear a "popping" sound when the burner cycles off. This is a normal operating sound of the burner.

OVEN RACKS

The two oven racks are designed with a "lock-stop" position to keep racks from accidentally coming completely out of the oven.

To remove: Be sure rack is cool. Pull rack out to the "lock-stop" position. Tilt up and continue pulling until rack releases.

To replace: Place rack on rack supports, tilt up and push toward rear of oven. Pull rack out to "lock-stop" position to be sure rack is correctly replaced.

RACK POSITIONS:

RACK 1 (top of oven) used for 2 rack cooking of oven meals.

RACK 2 used for two-rack baking or broiling thicker cuts of meat.

RACK 3 used for most one-rack baking and roasting some meats.

RACK 4 used for one or two rack baking and roasting large meats, cooking larger foods and for baking angel food cake or pie shells.

RACK 5 used for roasting turkey or baking angel food cake or pie shells.

HINTS:

NEVER place pans directly on the oven bottom. Do not cover entire rack with aluminum foil. Do not place foil directly on oven bottom or place foil directly under utensil. To catch spillovers, cut a piece of foil a little larger than the pan and place it on the rack below the rack containing the utensil.

If cooking on two racks, stagger pans so one is not directly over the other. Use rack positions 2 and 4, or 2 and 5, depending on baking results, when cooking on two racks.

PREHEATING

Preheating is necessary for baking. Allow oven to heat for 10 to 15 minutes before adding food. It is not necessary to preheat oven for roasting.

It is not necessary to preheat for broiling unless darker browning is desired or if cooking thin (3/4-inch) steaks. Allow burner to preheat 3 minutes.

Selecting temperature higher than desired will NOT preheat the oven any faster. Preheating at a higher temperature may have a negative effect on baking results.

To preheat: Set oven for baking and allow the oven to heat until display shows the preset temperature. 100 will appear in the display until the oven reaches 100°F. The display will then show the oven temperature in 5° increments until the oven reaches the preset temperature.

Once the preset temperature is reached, and the oven temperature has stabilized, a single beep will sound.

If the oven temperature is changed after preheating, a beep will signal that the oven has reached the new temperature setting.

For optimum baking results of cakes, cookies or biscuits, use one rack. Position rack so food is in the center of the oven. Allow 2 inches between edge of utensil and the oven sides or adjacent utensils.
**USING YOUR OVEN**

**TO SET OVEN:**

1. Press BAKE TEMP pad. BAKE indicator turns on.
2. Turn SET knob until desired temperature is displayed.
3. BAKE ON indicator and oven immediately turn on.
4. Place food in oven when oven has preheated to set temperature.
5. Check food at minimum time. Cook longer if necessary.
6. Press STOP/CLEAR pad to cancel the operation.

USING YOUR OVEN

HOW TO BROIL
Broiling is a method of cooking tender meats by direct heat under the burner. The cooking time is determined by the distance between the meat and the burner, the desired degree of doneness and the thickness of the meat.

Broiling requires the use of the broiler pan and insert. The correct position of the insert in the pan is very important. The broiler insert should be placed in the pan so grease will drain freely. Improper use may cause grease fires.

The broiler insert CANNOT be covered with aluminum foil as this prevents fat from draining into pan below. However, for easier cleaning, the broiler pan can be lined with foil.

Do not use disposable broiler pans. They do not provide a separate tray.

TO BROIL:
1. Prepare meat by removing excess fat and slashing remaining fat, being careful not to cut into meat. This will help keep meat from curling.
2. Place broiler pan on any of the recommended rack positions. Generally, for brown exterior and rare interior, the meat should be close to the burner. Place further down if you want meat well done.
3. Broiling should be done with oven door closed.
4. Follow suggested times on broiling chart. Meat should be turned once about half way through cooking.
5. Check doneness by cutting a slit in meat near center for desired color.
6. Press STOP/CLEAR pad to cancel a broil operation.

To set oven:
- Press BROIL pad. “Broil” lights in the display.
- Turn SET knob clockwise to select HI for normal broiling. Turn SET knob counter-clockwise to select LO for special low temperature broiling.
- “ON” lights in the display. The oven immediately turns on and begins to heat.

Use HI BROIL for most broil operations. When broiling longer cooking foods such as pork chops, poultry or thick steaks, select LO BROIL. Low temperature broiling allows food to cook to the well done stage without excessive browning. Cooking time may increase if LO BROIL is selected.

ELECTRICAL CONNECTION
Appliances which require electrical power are equipped with a three-prong grounding plug which must be plugged directly into a properly grounded three-hole 120 volt electrical outlet.

How to Remove Range for Cleaning and Servicing
When necessary, follow these procedures to remove appliance for cleaning or servicing:

1. Shut-off gas supply to appliance.
2. Disconnect electrical supply to appliance.
3. Disconnect gas supply tubing to appliance.
4. Slide range forward to disengage range from the anti-tip bracket. (See Installation Instructions for location of bracket.)
5. Reverse procedure to reinstall. If gas line has been disconnected, check for gas leaks after reconnection. (See Installation Instructions for gas leak test method.)

BACKGUARD LIGHT
To turn on backguard light, press and hold “cooktop” rocker switch, located on backguard, until light turns on.

To replace fluorescent surface light: Disconnect power to range. Grasp the top trim of backguard with thumbs under front edge and pull outward while lifting to release trim from catches at each end.

Always disconnect power to appliance before servicing.

If an ungrounded, two-hole or other type electrical outlet is encountered, IT IS THE PERSONAL RESPONSIBILITY OF THE APPLIANCE OWNER TO HAVE RECEPTACLE REPLACED WITH A PROPERLY GROUNDED THREE HOLE ELECTRICAL OUTLET. The three-prong grounding plug is provided for protection against shock hazards. DO NOT CUT OR REMOVE THE THIRD GROUNDING PRONG FROM THE POWER CORD PLUG.

Remove bulb and replace with an 18 watt fluorescent tube. Snap top trim back into place, restore power, and reset clock.

OVEN LIGHT
To turn on oven light, press “oven” rocker switch, located on backguard.

To replace oven light: Before replacing light bulb, DISCONNECT POWER TO RANGE. Be sure bulb is cool. Do not touch a hot bulb with a damp cloth as the bulb may break. Use a dry potholder and carefully unscrew bulb cover and bulb.

BACKGUARD LIGHT
To turn on backguard light, press and hold “cooktop” rocker switch, located on backguard, until light turns on.

To replace fluorescent surface light: Disconnect power to range. Grasp the top trim of backguard with thumbs under front edge and pull outward while lifting to release trim from catches at each end.

Replace with a 40 watt appliance bulb. Reconnect power to range and reset clock.
LEVELING LEGS
Some floors are not level. For proper baking, your range must be level. Leveling legs are located on each corner of the base of the range. Place a level horizontally on an oven rack and check front-to-back and side-to-side. Level by turning the legs.

ANTI-TIP BRACKET
To prevent range from accidently tipping, range should be secured to the floor by sliding rear leveling leg into an anti-tip bracket supplied with the range. Flame must be of sufficient size to be stable on all burner ports. If flame adjustment is needed, adjust ONLY on the LOW setting. Never adjust flame size on a higher setting.

PROPORTIONAL VALVE ADJUSTMENT
The LOW setting should produce a stable flame when turning the knob from HI to LOW. The flame should be 1/8 inch or lower and must be stable on all ports on LOW setting.

To adjust: Operate burner on HI for about 5 minutes to preheat burner cap. Turn knob back to LOW; remove knob, and insert a small screwdriver into the center of the valve stem. Adjust flame size by turning adjustment screw in either direction. NOTE: All gas adjustments should be done by a qualified servicer only.
## CARE AND CLEANING

<table>
<thead>
<tr>
<th>PARTS</th>
<th>CLEANING AGENTS</th>
<th>DIRECTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Baked Enamel</strong>&lt;br&gt;Side panels&lt;br&gt;Backguard&lt;br&gt;Oven door&lt;br&gt;Storage drawer</td>
<td>Soap &amp; water. Paste of baking soda &amp; water.</td>
<td>Use a dry towel or cloth to wipe up spills, especially acid spills, as soon as they occur. (This is especially important for white surfaces.) When surface is cool, wash with soap and water. Do not use abrasive or harsh cleaning liquids and powders or oven cleaners. These will scratch and permanently damage the finish. Dry with a soft cloth.</td>
</tr>
<tr>
<td><strong>Broiler pan &amp; insert</strong>&lt;br&gt;Bake pan</td>
<td>Soap &amp; water. Plastic scouring pad. Soap filled scouring pad.</td>
<td>Remove from oven after use. Cool then pour off grease. Place soapy cloth over insert and pan, let soap to loosen soil. Wash in warm soapy water. Use soap filled scouring pad to remove stubborn soil. Clean in dishwasher if desired.</td>
</tr>
<tr>
<td><strong>Chrome drip bowls, if equipped</strong>&lt;br&gt;Drip pans</td>
<td>Soap &amp; water. Paste of baking soda &amp; water. Plastic scouring pad.</td>
<td>Clean bowls after each use with soap and water. Remove stubborn stains with baking soda paste and plastic scouring pad. To prevent scratching the finish, do not use abrasive cleaning agents. Rinse, dry and replace. NOTE: Bowls can permanently discolor if exposed to excessive heat or if soil is allowed to bake on.</td>
</tr>
<tr>
<td><strong>Control knobs</strong>&lt;br&gt;Knobs</td>
<td>Soap &amp; water.</td>
<td>To remove knobs for cleaning, gently pull forward. Wash in mild detergent and water. Do not use abrasive cleaning agents. They will scratch and remove markings. Rinse, dry and replace. Turn each burner ON to see if knobs have been replaced correctly.</td>
</tr>
<tr>
<td><strong>Glass</strong>&lt;br&gt;Backguard&lt;br&gt;Oven window</td>
<td>Soap &amp; water. Paste of baking soda &amp; water. Window cleaning fluid.</td>
<td>Wash with soap and water. Remove stubborn soil with paste of baking soda and water. To avoid inside staining of oven door glass, do not oversaturate cloth. Do not use abrasive materials such as scouring pads, steel wool or powdered cleaning agents. They will damage glass. Rinse with clear water and dry.</td>
</tr>
<tr>
<td><strong>Grates</strong>&lt;br&gt;Trim parts&lt;br&gt;Manifold panel</td>
<td>Detergent &amp; water. Soap filled scouring pad.</td>
<td>Grates are made of porcelain coated steel. They can be cleaned at the sink with detergent and water or in the dishwasher. Clean stubborn soil with soap filled scouring pad.</td>
</tr>
<tr>
<td><strong>Metal finishes</strong>&lt;br&gt;Backguard&lt;br&gt;Trim parts&lt;br&gt;Manifold panel</td>
<td>Soap &amp; water. Paste of baking soda &amp; water.</td>
<td>Wash with soap and water. Remove stubborn soil with paste of baking soda and water. Do not use oven cleaners, abrasive or caustic agents. They will damage the finish.</td>
</tr>
<tr>
<td><strong>Oven racks</strong>&lt;br&gt;Cleaning powder &amp; plastic pads</td>
<td>Soap &amp; water. Cleansing powder &amp; plastic pads, Soap filled scouring pad.</td>
<td>Clean with soapy water. Remove stubborn soil with cleansing powder or soap filled scouring pad. Rinse and dry.</td>
</tr>
<tr>
<td><strong>Plastic finishes</strong>&lt;br&gt;Door handles&lt;br&gt;Backguard trim&lt;br&gt;Overlays&lt;br&gt;Knobs&lt;br&gt;End caps&lt;br&gt;Manifold panels</td>
<td>Soap &amp; water. Paste of baking soda &amp; water. Non-abrasive plastic pad or sponge.</td>
<td>Never use oven cleaners, abrasive or caustic liquid or powdered cleaning agents on plastic finishes. These cleaning agents will scratch or mar finish. To prevent staining or discoloration, wipe up fat, grease or acid (tomato, lemon, vinegar, milk, fruit juice, marinade) immediately with a dry paper towel or cloth. When surface is cool, clean with soap and water; rinse, and dry.</td>
</tr>
<tr>
<td><strong>Porcelain finish</strong>&lt;br&gt;Top of cooktop</td>
<td>Soap &amp; water. Paste of baking soda &amp; water. Non-abrasive plastic pad or sponge.</td>
<td>Porcelain enamel is glass fused on metal. It may crack or chip with misuse. Clean with soap and water when parts are cool. All spillovers, especially acid or sugar spillovers, should be wiped up immediately with a dry cloth. Surface may discolor or dull if soil is not removed. When surface is cool, clean with warm soapy water. NEVER WIPE OFF A WARM OR HOT ENAMEL SURFACE WITH A DAMP CLOTH! THIS MAY CAUSE CRACKING AND CHIPPING. Never use abrasive or caustic cleaning agents on exterior finish of range. Cooktop does not lift up. Do not use oven cleaner on self-clean oven.</td>
</tr>
<tr>
<td><strong>Surface burners</strong>&lt;br&gt;Thermowells</td>
<td>Soap &amp; water. Paste of baking soda &amp; water. Plastic scouring sponge or pad.</td>
<td>Clean as necessary with warm soapy water. Remove stubborn soil by scouring with a non-abrasive plastic scouring pad and a paste of baking soda and water. Clean ports with a straight pin. Do not enlarge or distort the ports. Do not use a wooden toothpick. It may break off and clog port. DO NOT CLEAN BURNERS WITH THE FOLLOWING caustic cleaners: oven cleaners, steel wool or abrasive cleaning agents. These may damage finish. Sealed surface burners can not be removed by the consumer.</td>
</tr>

Service

Do not attempt to service the appliance yourself unless directed to do so in this book. Contact the dealer who sold you the appliance for service.

How to Obtain Service

When your appliance requires service or replacement parts, contact your Dealer or Authorized Servicer. Use only genuine factory or Maycor parts if replacement parts are necessary. Consult the Yellow Pages in your telephone directory for the service center nearest you. Be sure to include your name, address, and phone number, along with the model and serial numbers of the appliance. (See front cover for location of your model and serial numbers.)

If you are unable to obtain service, write to us. Our address is found on the rating plate. See front cover for location of rating plate.

If you did not receive satisfactory service through your servicer or Maycor you may contact the Major Appliance Consumer Action Panel by letter including your name, address, and telephone number, as well as the model and serial numbers of the appliance.

If you are not satisfied with the local response to your service requirements, call or write MAYCOR Appliance Parts and Service Company, 240 Edwards Street, S.E., Cleveland, TN 37311, (615) 472–3500. Include or have available the complete model and serial numbers of the appliance, the name and address of the dealer from whom you purchased the appliance, the date of purchase and details concerning your problem.

FULL ONE-YEAR WARRANTY
DOMESTIC GAS OR ELECTRIC RANGE

Maycor Appliance Parts & Service Company will repair or replace, without charge, any part of your product which has a defect in material or workmanship during the first year after the date of the original installation. This warranty extends to any owner during the one-year warranty period.

LIMITED 5 YEAR WARRANTY

On electric ranges equipped with solid disc or smoothtop heating elements, and on gas ranges with sealed burners, for an additional 4 year period beyond the first year of the general coverage of this warranty, Maycor will replace any of the solid disc or smoothtop heating elements, or sealed burners which fail to heat as a result of defective workmanship or material. Additionally, Maycor will replace any smoothtop cooking surface which cracks or breaks during normal household cooking. These parts must be installed by a qualified person. Any labor charge required for replacement is not covered by this warranty.

HOW TO OBTAIN SERVICE

To obtain the repair or replacement of a defective part under these warranties, you should contact the dealer from whom you purchased the appliance or a servicer he designates.

WHAT IS NOT COVERED BY THESE WARRANTIES

1. Conditions and damage resulting from improper installation, delivery, unauthorized repair, modification, or damage not attributable to a defect in material or workmanship.

2. Conditions resulting from damage, such as: (1) improper maintenance, (b) misuse, abuse, accident, or (c) incorrect electrical current or voltage.

3. Warranties are void if the original serial number has been removed, altered, or cannot be readily determined.

4. Light bulbs.

ADDITIONAL HELP

If you are not satisfied with the local response to your service requirements and wish to contact Maycor, please address your letter to the Customer Relations Department, Maycor Parts & Service Company, 240 Edwards Street, S.E., Cleveland, TN 37311 or call (615) 472-3500. To save time, your letter should include the complete model and serial numbers of the warranted appliance, the name and address of the dealer from whom you purchased the appliance, the date of purchase and details concerning your problem.

These warranties are the only written or expressed warranties given by Maycor. No one is authorized to increase, alter, or enlarge Maycor's responsibilities or obligations under these warranties. These warranties give you specific legal rights, and you may also have other rights which vary from state to state.
