DRYER SAFETY

Your safety and the safety of others are very important.

We have provided many important safety messages in this manual and on your appliance. Always read and obey all safety messages.

This is the safety alert symbol.

This symbol alerts you to potential hazards that can kill or hurt you and others.

All safety messages will follow the safety alert symbol and either the word “DANGER” or “WARNING.”

These words mean:

⚠ DANGER

You can be killed or seriously injured if you don't immediately follow instructions.

⚠ WARNING

You can be killed or seriously injured if you don't follow instructions.

All safety messages will tell you what the potential hazard is, tell you how to reduce the chance of injury, and tell you what can happen if the instructions are not followed.

IMPORTANT SAFETY INSTRUCTIONS

WARNING: To reduce the risk of fire, electric shock, or injury to persons when using the dryer, follow basic precautions, including the following:

- Read all instructions before using the dryer.
- Do not place items exposed to cooking oils in your dryer. Items contaminated with cooking oils may contribute to a chemical reaction that could cause a load to catch fire.
- Do not dry articles that have been previously cleaned in, washed in, soaked in, or spotted with gasoline, dry-cleaning solvents, or other flammable or explosive substances as they give off vapors that could ignite or explode.
- Do not allow children to play on or in the dryer. Close supervision of children is necessary when the dryer is used near children.
- Before the dryer is removed from service or discarded, remove the door to the drying compartment.
- Do not reach into the dryer if the drum is moving.
- Do not install or store the dryer where it will be exposed to the weather.
- Do not tamper with controls.
- Do not repair or replace any part of the dryer or attempt any servicing unless specifically recommended in this Use and Care Guide or in published user-repair instructions that you understand and have the skills to carry out.
- Do not use fabric softeners or products to eliminate static unless recommended by the manufacturer of the fabric softener or product.
- Do not use heat to dry articles containing foam rubber or similarly textured rubber-like materials.
- Clean lint screen before or after each load.
- Keep area around the exhaust opening and adjacent surrounding areas free from the accumulation of lint, dust, and dirt.
- The interior of the dryer and exhaust vent should be cleaned periodically by qualified service personnel.
- See installation instructions for grounding requirements.

SAVE THESE INSTRUCTIONS

INSTALLATION INSTRUCTIONS

Tools and Parts

Tools needed

Gather the required tools and parts before starting installation. Read and follow the instructions provided with any tools listed here.

- Flat-blade screwdriver
- Level
- Adjustable wrench
- Vent clamps
- Caulking gun and compound (for installing new exhaust vent)
- Tin snips (new vent installations)

Parts supplied

Remove parts package from the dryer drum. Check that all parts listed are included.

- 1 - Cycle Control (timer) knob
- 1 - Push to Start button
- 4 - Casters
- 2 - Cord brackets
- 2 - Screws

Parts needed

Check local codes, existing electrical supply and venting, and see “Venting Requirements” and “Electrical Requirements” before purchasing parts.

- Mobile home installations require metal exhaust system hardware
- Permanent installations require 4 dryer feet

For information on ordering, please reference the “Assistance or Service” section. You can also contact the dealer from whom you purchased your dryer.

Location Requirements

⚠ WARNING

Explosion Hazard

Keep flammable materials and vapors, such as gasoline, away from dryer.

Place dryer at least 18 inches (46 cm) above the floor for a garage installation.

Failure to do so can result in death, explosion, or fire.

You will need

- A location that allows for proper exhaust installation. See “Venting Requirements.”
- A 120-volt, 60-Hz., AC-only, 15- or 20-amp circuit.
- A grounded electrical outlet located within 2 ft (61 cm) of either side of the dryer. See “Electrical Requirements.”
- A sturdy floor to support the dryer weight (dryer and load) of 115 lbs (52 kg). The combined weight of a companion appliance should also be considered.
- A level floor with a maximum slope of 1" (2.5 cm) under entire dryer.

Do not operate your dryer at temperatures below 45°F (7°C). At lower temperatures, the dryer might not shut off at the end of an automatic cycle. Drying times can be extended.

The dryer must not be installed or stored in an area where it will be exposed to water and/or weather.

Check code requirements. Some codes limit, or do not permit, installation of the dryer in garages, closets, mobile homes or sleeping quarters. Contact your local building inspector.

Installation Clearances

The location must be large enough to allow the dryer door to open fully.

Dryer Dimensions

†Height with caster is 32½" (82.6 cm)

*Most installations require a minimum 5" (12.70 cm) clearance behind the dryer for the exhaust vent with elbows. See "Venting Requirements."

Minimum installation spacing for recessed area and closet installation

The following dimensions shown are for the minimum spacing allowed when the dryer is to be operated with, or without, the Stack Stand Kit. To purchase a Stack Stand Kit, see "Assistance or Service."

- Additional spacing should be considered for ease of installation and servicing.
- Additional clearances might be required for wall, door and floor moldings.
- Additional spacing of 1" (2.5 cm) on all sides of the dryer is recommended to reduce noise transfer.
- For closet installation with a door, minimum ventilation openings in the top and bottom of the door are required. Louvered doors with equivalent ventilation openings are acceptable.
- Companion appliance spacing should also be considered.

Recessed or closet installation - Dryer only

A. Side view - closet or confined area
B. Recessed area

Recessed or closet installation - Stacked

A. Recessed area
B. Side view - closet or confined area
C. Closet door with vents

Mobile Home - Additional Location Requirements

This dryer is suitable for mobile home installations. The installation must conform to the Manufactured Home Construction and Safety Standard, Title 24 CFR, Part 3280 (formerly the Federal Standard for Mobile Home Construction and Safety, Title 245, HUD Part 280) or Standard CAN/CSA-Z240 MH.

Mobile home installations require:

- Metal exhaust system hardware, which is available for purchase from your dealer.
- Special provisions must be made in mobile homes to introduce outside air into the dryer. The opening (such as a nearby window) should be at least twice as large as the dryer exhaust opening.

Electrical Requirements

⚠ WARNING

Electrical Shock Hazard

Plug into a grounded 3 prong outlet.

Do not remove ground prong.

Do not use an adapter.

Do not use an extension cord.

Failure to follow these instructions can result in death, fire, or electrical shock.

- A 120-volt, 60-Hz., AC-only, 15- or 20-amp fused electrical supply is required.
- A time-delay fuse or circuit breaker is recommended. Be sure fuse or circuit breaker matches the rating of your line.
- Use a separate circuit serving only your dryer.
- Do not use an extension cord.

GROUNDING INSTRUCTIONS

■ For a grounded, cord-connected dryer:
This dryer must be grounded. In the event of malfunction or breakdown, grounding will reduce the risk of electric shock by providing a path of least resistance for electric current. This dryer is equipped with a cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances.

WARNING: Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or service representative or personnel if you are in doubt as to whether the dryer is properly grounded. Do not modify the plug provided with the dryer: if it will not fit the outlet, have a proper outlet installed by a qualified electrician.

SAVE THESE INSTRUCTIONS

Venting Requirements

⚠ WARNING

Fire Hazard

Use a heavy metal vent.

Do not use a plastic vent.

Do not use a metal foil vent.

Failure to follow these instructions can result in death or fire.

WARNING: To reduce the risk of fire, this dryer MUST BE EXHAUSTED OUTDOORS.

IMPORTANT: Observe all governing codes and ordinances. The dryer exhaust must not be connected into any gas vent, chimney, wall, ceiling or a concealed space of a building.

If using an existing vent system

- Clean lint from the entire length of the system and make sure exhaust hood is not plugged with lint.
- Replace any plastic or metal foil vent with rigid or flexible heavy metal vent.
- Review Vent system chart. Modify existing vent system if necessary to achieve the best drying performance.

If this is a new vent system

Vent material

- Use a heavy metal vent. Do not use plastic or metal foil vent.
- 4" (10.2 cm) heavy metal exhaust vent and clamps must be used.

4" (10.2 cm) heavy metal exhaust vent

Rigid metal vent

- For best drying performance, rigid metal vents are recommended.
- Rigid metal vent is recommended to avoid crushing and kinking.

Flexible metal vent

- Flexible metal vents are acceptable only if accessible for cleaning.
- Flexible metal vent must be fully extended and supported when the dryer is in its final location.
- Remove excess flexible metal vent to avoid sagging and kinking that may result in reduced airflow and poor performance.
- Do not install flexible metal vent in enclosed walls, ceilings or floors.

Elbows

45° elbows provide better airflow than 90° elbows.

Good

Better

Clamps

- Use clamps to seal all joints.
- Exhaust vent must not be connected or secured with screws or other fastening devices that extend into the interior of the duct. Do not use duct tape.

Clamp

Exhaust

Recommended hood styles are shown here.

A. Louvered hood style
B. Box hood style

The angled hood style (shown here) is acceptable.

- An exhaust hood should cap the vent to keep rodents and insects from entering the home.
- Exhaust hood must be at least 12" (30.5 cm) from the ground or any object that may be in the path of the exhaust (such as flowers, rocks, bushes, snow line, etc.).
- Do not use an exhaust hood with a magnetic latch.

Improper venting can cause moisture and lint to collect indoors, which may result in:

- Moisture damage to woodwork, furniture, paint, wallpaper, carpets, etc.
- Housecleaning problems and health problems.

Plan Vent System

Choose your exhaust installation type

Recommended exhaust installations

Typical installations vent the dryer from the rear of the dryer.

A. Exhaust hood

B. Flexible metal vent or rigid metal vent

C. Elbow

Alternate installations for close clearances

Venting systems come in many varieties. Select the type best for your installation. Two close-clearance installations are shown. Refer to the manufacturer's instructions.

A. Over-the-top installation (also available with one offset elbow)

B. Periscope installation

NOTE: The following kits for close clearance alternate installations are available for purchase. For information on ordering, see "Assistance or Service."

- Over-the-Top Installation:
Part Number 4396028
- Periscope Installation (for use with dryer vent to wall vent mismatch):
Part Number 4396037 - for mismatch of 0" (0 cm) to 18" (45.72 cm)
Part Number 4396011 - for mismatch of 18" (45.72 cm) to 29" (73.66 cm)
Part Number 4396014 - for mismatch of 29" (73.66 cm) to 50" (127 cm)

Special provisions for mobile home installations

The exhaust vent must be securely fastened to a noncombustible portion of the mobile home structure and must not terminate beneath the mobile home. Terminate the exhaust vent outside.

Determine vent path

- Select the route that will provide the straightest and most direct path outdoors.
- Plan the installation to use the fewest number of elbows and turns.
- When using elbows or making turns, allow as much room as possible.
- Bend vent gradually to avoid kinking.
- Use the fewest 90° turns possible.

Determine vent length and elbows needed for best drying performance

- Use the Vent system chart below to determine type of vent material and hood combinations acceptable to use.
- NOTE:** Do not use vent runs longer than those specified in the Vent system chart. Exhaust systems longer than those specified will:
- Shorten the life of the dryer.
 - Reduce performance, resulting in longer drying times and increased energy usage.

The Vent system chart provides venting requirements that will help to achieve the best drying performance.

Vent system chart

Number of 90° turns or elbows	Type of vent	Box or louvered hoods	Angled hoods
0	Rigid metal	36 ft (11 m)	26 ft (7.9 m)
	Flexible metal	28 ft (8.5 m)	22 ft (6.7 m)
1	Rigid metal	26 ft (7.9 m)	16 ft (4.9 m)
	Flexible metal	18 ft (5.5 m)	12 ft (3.7 m)
2	Rigid metal	16 ft (4.9 m)	6 ft (1.8 m)
	Flexible metal	8 ft (2.8 m)	2 ft (0.6 m)

Install Vent System

1. Before installing the vent system, be sure to remove the wire exhaust guard that is located at the exhaust outlet.
- 
2. Install exhaust hood. Use caulking compound to seal exterior wall opening around exhaust hood.
 3. Connect vent to exhaust hood. Vent must fit inside exhaust hood. Secure vent to exhaust hood with 4" (10.2 cm) clamp.
 4. Run vent to dryer location. Use the straightest path possible. See "Determine vent length." Avoid 90° turns. Use clamps to seal all joints. Do not use duct tape, screws or other fastening devices that extend into the interior of the vent to secure vent.

Install Cord Bracket and Casters

Do not move dryer into its final location until the following steps have been performed.

WARNING

Excessive Weight Hazard

Use two or more people to move and install dryer.
Failure to do so can result in back or other injury.

Install cord bracket

1. Remove tape from the power cord and the rear panel.
2. Insert cord brackets into slotted holes in rear panel and secure with screws provided.

A. Cord bracket
B. Slotted hole
C. Screw

NOTE: Power supply cord may be wrapped around the brackets for storage convenience when dryer is not in use.

Install casters

1. Lay the dryer on its side.
2. Use the carton to avoid damage to the dryer.

3. Screw casters into dryer base at four corners and tighten securely.
4. Set the dryer upright. In doing so, be certain that the dryer does not roll away from you.

NOTE: Permanent installations require 4 dryer feet. See "Assistance or Service" section for information on ordering.

Connect Vent

1. Using a 4" (10.2 cm) clamp, connect vent to exhaust outlet in dryer. If connecting to existing vent, make sure the vent is clean. The dryer vent must fit over the dryer exhaust outlet and inside the exhaust hood. Check that the vent is secured to exhaust hood with a 4" (10.2 cm) clamp.
2. Move dryer into its final location. Do not crush or kink vent.
3. (On gas models) Check that there are no kinks in the flexible gas line.
4. Once the exhaust vent connection is made, remove the corner posts and cardboard.

Complete Installation

1. Check that all parts are now installed. If there is an extra part, go back through the steps to see which step was skipped.
2. Check that you have all of your tools.
3. Dispose of/recycle all packaging materials.
4. Check the dryer's final location. Be sure the vent is not crushed or kinked.
5. Check that the dryer is on a level surface.
6. Plug into a grounded 3 prong outlet. Turn power on.
7. Remove the blue protective film on the console and any tape remaining on the dryer. Remove tape from the lint screen (located on inside back wall of dryer).
8. Read "Dryer Use."
9. Wipe the dryer drum interior thoroughly with a damp cloth to remove any dust.
10. To test the dryer, set the dryer on a full heat cycle (not an air cycle) for 20 minutes and start the dryer.

If the dryer will not start, check the following:

- Controls are set in a running or "On" position.
 - Push to Start button has been firmly pressed.
 - Dryer is plugged into an outlet and/or electrical supply is on.
 - Household fuse is intact and tight, or circuit breaker has not tripped.
 - Dryer door is closed.
11. When the dryer has been running for 5 minutes, open the dryer door and feel for heat. If you feel heat, cancel cycle and close the door.

If you do not feel heat, check the following:

- Controls are set on a heated cycle, not an air cycle.

NOTE: You may notice a burning odor when dryer is first heated. This odor is common when the heating element is first used. The odor will go away.

DRYER USE

Starting Your Dryer

1. Load clothes loosely into the dryer and close the door. Do not pack the dryer. Allow space for clothes to tumble freely.

⚠️ WARNING

Explosion Hazard

Keep flammable materials and vapors, such as gasoline, away from dryer.

Do not dry anything that has ever had anything flammable on it (even after washing).

Failure to follow these instructions can result in death, explosion, or fire.

2. Turn the Cycle Control knob to the recommended cycle for the type of load being dried. Use the Energy Preferred Automatic Setting (*) to dry most heavyweight and medium-weight loads. See "Drying, Cycle and Temperature Tips."

3. Press the PUSH TO START button.

⚠️ WARNING

Fire Hazard

No washer can completely remove oil.

Do not dry anything that has ever had any type of oil on it (including cooking oils).

Items containing foam, rubber, or plastic must be dried on a clothesline or by using an Air Cycle.

Failure to follow these instructions can result in death or fire.

Stopping and Restarting

You can stop your dryer anytime during a cycle.

To stop your dryer

Open the dryer door or turn the Cycle Control knob to OFF.

NOTE: The Cycle Control knob should point to an Off area when the dryer is not in use.

To restart your dryer

1. Close the door.
2. Select a new cycle and temperature (if desired).
3. Press the Start button.

WARNING: To reduce the risk of fire, electric shock, or injury to persons, read the IMPORTANT SAFETY INSTRUCTIONS before operating this appliance. Before using your dryer, wipe the dryer drum with a damp cloth to remove dust from storing and shipping.

Drying, Cycle and Temperature Tips

Select the correct cycle and temperature for your load.

Your dryer tumbles the load without heat during the last few minutes of all cycles to make the load easier to handle.

Drying tips

- Follow care label directions when they are available.
- If desired, add a fabric softener sheet. Follow package instructions.
- Remove the load from the dryer as soon as tumbling stops to reduce wrinkling. This is especially important for permanent press, knits and synthetic fabrics.

Cycle and temperature tips

- Dry most loads using the Energy Preferred Automatic Setting (*).
- Use a no heat (air) setting for rubber, plastic or heat-sensitive fabrics.
- Line dry bonded or laminated fabrics.

NOTE: If you have questions about drying temperatures for various loads, refer to the care label directions.

Permanent Press

This automatic cycle shuts off the dryer when the selected dryness is reached. The Cycle Control knob does not move until the load is almost dry. After the cool down, the knob automatically turns to an Off area and tumbling stops.

Dry most loads using the Energy Preferred Automatic Setting (*).

- If the load is drier than you like, select a setting closer to Less Dry the next time you dry a similar load.
- If the load is not as dry as you like, complete drying using the Timed Drying cycle. The next time you dry a similar load, select a setting closer to More Dry.

NOTE: Drying time with an automatic cycle varies according to the type of fabric and size of load.

Air Dry Cycle

Use this cycle for items that require drying without heat, such as rubber, plastic, and heat-sensitive fabrics. See the chart for examples of items that can be dried using an air cycle.

Type of Load	Time*
Foam rubber—pillows, padded bras, stuffed toys	20 - 30
Plastic—shower curtains, tablecloths	20 - 30
Rubber-backed rugs	40 - 50
Olefin, polypropylene, sheer nylon	10 - 20

*(Minutes). Reset cycle to complete drying, if needed.

When using an air cycle

- Check to see that coverings are securely stitched.
- Shake and fluff pillows by hand periodically during cycle.
- Dry item completely. Foam rubber pillows are slow to dry.

Timed Dry Cycle

Use this cycle to complete drying if items are still damp after the automatic cycle.

Timed Dry is also useful for:

- Heavyweight items and work clothes that require a long drying time.
- Lightweight items, such as lingerie, blouses, and knits that require a short drying time.

For damp dry, turn the Cycle Control knob to 30 minutes or less.

End of Cycle Signal

The dryer sounds a signal to let you know when the cycle is finished. The signal is not adjustable and cannot be turned off. The signal is helpful when you are drying permanent press, synthetics, and other items that should be taken out as soon as the dryer stops.

DRYER CARE

Cleaning the Dryer Location

Keep dryer area clear and free from items that would obstruct the flow of combustion and ventilation air.

! WARNING

Explosion Hazard

Keep flammable materials and vapors, such as gasoline, away from dryer.

Place dryer at least 18 inches (46 cm) above the floor for a garage installation.

Failure to do so can result in death, explosion, or fire.

Cleaning the Lint Screen

Every load cleaning

The lint screen is located inside the dryer drum, on the back wall. Clean it before each load. A screen blocked by lint can increase drying time.

To clean

1. Open the door and pull the lint screen straight out.

2. Squeeze body of lint screen lightly while pulling off the cover.
3. Roll lint off the screen with your fingers. Do not rinse or wash screen to remove lint. Wet lint is hard to remove.
4. Replace cover on lint screen body. Push the lint screen firmly back into place and close the door.

IMPORTANT:

- Do not run the dryer with the lint screen loose, damaged, blocked, or missing. Doing so can cause overheating and damage to both the dryer and fabrics.

As needed cleaning

Laundry detergent and fabric softener residue can build up on the lint screen. This buildup can cause longer drying times for your clothes, or cause the dryer to stop before your load is completely dry. The screen is probably clogged if lint falls off the screen.

Clean the lint screen with a nylon brush every 6 months, or more frequently if it becomes clogged due to a residue buildup.

To wash

1. Roll lint off the screen with your fingers.
2. Wet both the lint screen cover and body with hot water.

3. Wet a nylon brush with hot water and liquid detergent. Scrub lint screen cover and body with the brush to remove residue buildup.

4. Rinse with hot water.
5. Thoroughly dry lint screen body and cover with a clean towel. Replace in dryer.

Cleaning the Dryer Interior

To clean dryer drum

1. Make a paste with powdered laundry detergent and very warm water.
2. Apply paste to a soft cloth.
OR
Apply a liquid, nonflammable household cleaner to the stained area and rub with a soft cloth until all excess dye is removed.
3. Wipe drum thoroughly with a damp cloth.
4. Tumble a load of clean cloths or towels to dry drum.

NOTE: Garments that contain unstable dyes, such as denim blue jeans or brightly colored cotton items, may discolor the dryer interior. These stains are not harmful to your dryer and will not stain future loads of clothes. Dry unstable dye items inside out to avoid transfer of dye.

Removing Accumulated Lint

From Inside the Dryer Cabinet

Lint should be removed every 2 years, or more often, depending on dryer usage. Cleaning should be done by a qualified person.

From the Exhaust Vent

Lint should be removed every 2 years, or more often, depending on dryer usage.

Vacation and Moving Care

Vacation care

Operate your dryer only when you are at home. If you will be on vacation or not using your dryer for an extended period of time, you should:

1. Unplug dryer or disconnect power.
2. Wash lint screen.

Moving care

1. Unplug the power supply cord.
2. Make sure leveling legs are secure in dryer base.
3. Use masking tape to secure dryer door.

TROUBLESHOOTING

First try the solutions suggested here to possibly avoid the cost of a service call...

Dryer Operation

Dryer will not run

- **Has a household fuse blown, or has a circuit breaker tripped?**
There may be 2 fuses or circuit breakers for the dryer. Check to that both fuses are intact and tight, or that both circuit breakers have not tripped. Replace the fuse or reset the circuit breaker. If the problem continues, call an electrician.
- **Is the correct power supply available?**
This electric dryer requires 120-volt power supply. Check with a qualified electrician.
- **Was a regular fuse used?**
Use a time-delay fuse.
- **Is the dryer door firmly closed?**
- **Was the PUSH TO START DRYER button firmly pressed?**

No heat

- **Has a household fuse blown, or has a circuit breaker tripped?**
The drum may be turning, but you may not have heat. Electric dryers use 2 fuses or circuit breakers. Replace the fuse or reset the circuit breaker. If the problem continues, call an electrician.

Unusual sounds

- **Has the dryer had a period of non-use?**
If the dryer hasn't been used for a while, there may be a thumping sound during the first few minutes of operation.
- **Is a coin, button, or paper clip caught between the drum and front or rear of the dryer?**
Check the front and rear edges of the drum for small objects. Clean out pockets before laundering.
- **Are the four legs installed, and is the dryer level front to back and side to side?**
The dryer may vibrate if not properly installed. See the Installation Instructions.
- **Is the clothing knotted or balled up?**
When balled up, the load will bounce, causing the dryer to vibrate. Separate the load items and restart the dryer.

Timer does not noticeably advance

- **Is the dryer set to Timed or Air Dry?**
The timer moves slowly and continuously for the time setting.
- **Is the dryer set to Automatic Drying?**
The timer moves only when the clothing is mostly dry.

Dryer Results

Clothes are not drying satisfactorily, drying times are too long, or load is too hot

NOTE: The compact dryer operates at a lower wattage. Expect longer drying times.

- **Is the lint screen clogged with lint?**
Lint screen should be cleaned before each load.

! WARNING

Fire Hazard

Use a heavy metal vent.

Do not use a plastic vent.

Do not use a metal foil vent.

Failure to follow these instructions can result in death or fire.

- **Is the exhaust vent or outside exhaust hood clogged with lint, restricting air movement?**
Run the dryer for 5-10 minutes. Hold your hand under the outside exhaust hood to check air movement. If you do not feel air movement, clean exhaust system of lint or replace exhaust vent with heavy metal or flexible metal vent. See "Venting Requirements."
- **Are fabric softener sheets blocking the grille?**
Use only one fabric softener sheet, and use it only once.
- **Is the exhaust vent the correct length?**
Check that the exhaust vent is not too long or has too many turns. Long venting will increase drying times. See "Venting Requirements."
- **Is the exhaust vent diameter the correct size?**
Use 4" (10.2 cm) diameter vent material.

⚠ WARNING

Explosion Hazard

Keep flammable materials and vapors, such as gasoline, away from dryer.

Place dryer at least 18 inches (46 cm) above the floor for a garage installation.

Failure to do so can result in death, explosion, or fire.

- **Is the dryer located in a room with temperature below 45°F (7°C)?**
Proper operation of dryer cycles requires temperatures above 45°F (7°C).
- **Is the dryer located in a closet?**
Closet doors must have ventilation openings at the top and bottom of the door. The front of the dryer requires a minimum of 1" (2.5 cm) of airspace, and, for most installations, the rear of the dryer requires 5" (12.7 cm). See the Installation Instructions.
- **Has an air dry cycle been selected?**
Select the right cycle for the types of garments being dried.
- **Is the load too large and heavy to dry quickly?**
Separate the load to tumble freely.

Lint on load

- **Is the lint screen clogged?**
Lint screen should be cleaned before each load.

Stains on load or drum

- **Was dryer fabric softener properly used?**
Add dryer fabric softener sheets at the beginning of the cycle. Fabric softener sheets added to a partially dried load can stain your garments.

Drum stains are caused by dyes in clothing (usually blue jeans). This will not transfer to other clothing.

Loads are wrinkled

- **Was the load removed from dryer at the end of the cycle?**
- **Was the dryer overloaded?**
Dry smaller loads that can tumble freely.

Odors

- **Have you recently been painting, staining or varnishing in the area where your dryer is located?**
If so, ventilate the area. When the odors or fumes are gone from the area, rewash and dry the clothing.
- **Is the dryer being used for the first time?**
The new electric heating element may have an odor. The odor will be gone after the first cycle.

ASSISTANCE OR SERVICE

Before calling for assistance or service, please check "Troubleshooting." It may save you the cost of a service call. If you still need help, follow the instructions below.

When calling, please know the purchase date and the complete model and serial number of your appliance. This information will help us to better respond to your request.

If you need replacement parts

If you need to order replacement parts, we recommend that you only use factory specified parts. These parts will fit right and work right because they are made with the same precision used to build every new CROSLEY® appliance. To locate factory specified replacement parts in your area, call our Customer eXperience Center or your nearest designated service center.

For assistance or service

Call the Customer eXperience Center at **1-800-253-1301**.

Our consultants provide assistance with:

- Features and specifications on our full line of appliances
- Installation information
- Use and maintenance procedures
- Accessory and repair parts sales
- Specialized customer assistance (Spanish speaking, hearing impaired, limited vision, etc.)
- Referrals to local dealers, repair parts distributors, and service companies

Crosley designated service technicians are trained to fulfill the product warranty and provide after-warranty service, anywhere in the United States.

To locate the Crosley designated service company in your area, you can also look in your telephone directory Yellow Pages.

For further assistance

If you need further assistance, you can write to us with any questions or concerns at:

Crosley Distribution Center
c/o Correspondence Dept.
675 North Main Street
Winston-Salem, NC 27102-2111

Please include a daytime phone number in your correspondence.

Accessories U.S.A.

To order accessories, call the Customer eXperience Center toll free at **1-800-442-9991** and follow the menu prompts. Or visit our website at **www.crosley.com** and click on "Buy Accessories Online."

ACCESSORIES

Enhance your dryer with these premium accessories.

For more high-quality items or to order, call **1-800-901-2042**, or visit us at **www.applianceaccessories.com**. In Canada, call **1-800-807-6777** or visit us at **www.whirlpoolparts.ca**.

Part Number	Accessory
20-48KITRC	4 ft (1.2 m) gas line dryer connector installation kit
PT220L	4 ft (1.2 m) dryer cord, 3-wire, 30 amp

CROSLLEY® MAJOR APPLIANCE WARRANTY

ONE YEAR LIMITED WARRANTY

For one year from the date of purchase, when this major appliance is operated and maintained according to instructions attached to or furnished with the product, Whirlpool Corporation or Whirlpool Canada LP (hereafter "Whirlpool") will pay for factory specified parts and repair labor to correct defects in materials or workmanship. Service must be provided by a Whirlpool designated service company. This limited warranty applies only when the major appliance is used in the country in which it was purchased.

ITEMS WHIRLPOOL WILL NOT PAY FOR

1. Service calls to correct the installation of your major appliance, to instruct you how to use your major appliance, to replace or repair house fuses or to correct house wiring or plumbing.
 2. Service calls to repair or replace appliance light bulbs, air filters or water filters. Those consumable parts are excluded from warranty coverage.
 3. Repairs when your major appliance is used for other than normal, single-family household use.
 4. Damage resulting from accident, alteration, misuse, abuse, fire, flood, acts of God, improper installation, installation not in accordance with electrical or plumbing codes, or use of products not approved by Whirlpool.
 5. Any food loss due to refrigerator or freezer product failures.
 6. Replacement parts or repair labor costs for units operated outside the United States or Canada.
 7. Pickup and delivery. This major appliance is designed to be repaired in the home.
 8. Repairs to parts or systems resulting from unauthorized modifications made to the appliance.
 9. Expenses for travel and transportation for product service in remote locations.
 10. The removal and reinstallation of your appliance if it is installed in an inaccessible location or is not installed in accordance with published installation instructions.
 11. Replacement parts or repair labor costs when the major appliance is used in a country other than the country in which it was purchased.

DISCLAIMER OF IMPLIED WARRANTIES; LIMITATION OF REMEDIES

CUSTOMER'S SOLE AND EXCLUSIVE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE PRODUCT REPAIR AS PROVIDED HEREIN. IMPLIED WARRANTIES, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO ONE YEAR OR THE SHORTEST PERIOD ALLOWED BY LAW. WHIRLPOOL SHALL NOT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES. SOME STATES AND PROVINCES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, OR LIMITATIONS ON THE DURATION OF IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS, SO THESE EXCLUSIONS OR LIMITATIONS MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS AND YOU MAY ALSO HAVE OTHER RIGHTS, WHICH VARY FROM STATE TO STATE OR PROVINCE TO PROVINCE.

Outside the 50 United States and Canada, this warranty does not apply. Contact your authorized Crosley® dealer to determine if another warranty applies.

If you need service, first see the "Troubleshooting" section of the Use & Care Guide. After checking "Troubleshooting," additional help can be found by checking the "Assistance or Service" section or by calling Whirlpool. In the U.S.A., call **1-800-253-1301**. In Canada, call **1-800-807-6777**.
